Co-funded by the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Education and Culture Executive Agency (EACEA). Neither the European Union nor EACEA can be held responsible for them. Project: 101055851

Type of new partner

New partner for an existing regional CoVE

Procedure & steps

1. The partner contacts the regional captain

- Western Europe: Pieter Hoekstra
- Central Europe: Michaela Mensikova
- Baltics: Janis Rubulis
- Mediterranean: Paula Grech Bonnici
- South Africa: Manuel Jackson

2. Together, the regional captain and new partner identify

1. The needs of the partner in the field of water
2. How the CoVE can help solve those needs
3. How the CoVE and new partner can cocreate solutions for the needs
4. What the added value and foreseen impact of the collaboration is:

- Create an action plan for the upcoming 6 months, outlining tasks, responsibilities and contributions.
- The PoVE Water funding maps can be used to find additional funding

What will the new partner get

- Access to the mobility activities in the PoVE Water such as the international water weeks for students.
- Access to the **digital learning materials** in PoVE Water
- Access to the reputation, **recruitment and retainment**
- Invitations to the regional CoVE partner meetings
- Invitations to the Annual International Water Weeks in Leeuwarden and Brno
- The opportunity to work with the other partners on education, applied research, promotion of the water sector and develop new activities, potentially funded by new spin-off projects that build on the network of PoVE Water.
- The partner will be added to the **PoVE Water network map**

What will the new partner not get

Funding from the current Erasmus PoVE Water Scale up project or the other already running spin-off/related projects.

New partner
for an existing
regional CoVE

- The regional captain consults the other regional partners of the CoVE about the new partner
- During a pilot phase of 6 months up to a year, the new partner and regional CoVE work together, evaluating the collaboration afterwards.
- If the evaluation is positive, the new partner will structurally be added to the regional CoVE.
- Depending on the needs, the new partner can be involved in the PoVE activities as well.

Legal documents & governance:

- Depending on the local context, collaboration agreements, letters of intent, memoranda of understanding, consortium agreements can be signed to formalize the collaboration. This is only applicable if the regional setting requires it
- In case the regional CoVE has a legal entity, the bylaws of that entity apply for new members

Unless the regional CoVE has a legal entity, outlining the governance, the annual action plans based on the needs in the skills ecosystem are leading in the collaboration in the regional CoVE. The new partners can contribute to these action plans and participate.

- The partner can use the communication channels and network of PoVE Water to share relevant news and activities
- After the pilot period, the new partner can use the PoVE Water branding and will be mentioned as a partner on www.povewater.eu

Precondition of the above is active contribution of the new partner, eg. free rider behavior will revoke the abovementioned benefits.

Funding from the current Erasmus PoVE Water Scale up project or the other already running spin-off/ related projects.
